Create Eye-Catching Displays

Our UV-Curable display materials deliver what your customers want while meeting your production needs. Derived from our successful, market leading photographic display materials, they set the benchmark for quality, productivity, and first print yields.

New UV-Curable Clear Display Film is a transparent material for use on illuminators with built-in diffusers. Use UV-Curable Clear Display Film for large displays (such as trade-show stands and booths), in-store point-of-purchase materials, and indoor transit displays (airports, subways, etc.).

For high-performance photo-quality backlit displays featuring—

- **Photographic Look:** Our UV-Curable Display media can be mixed with traditional photographic signage and display, enabling a wide range of output solutions and printing strategies that balance quality and value.
- **High-Quality, Photographic-Base Materials:** UV-Curable Display media leverage proprietary professional photographic technology, produced to the most stringent industry standards - resulting in consistent output. This allows for maximum throughput and helps avoid costly rework.
- **Batch Consistency:** Even during long runs, output quality remains true. The media is designed to receive inks consistently across the entire production run, resulting in colors that match from start to finish. Within the roll or across multiple rolls, expect predictable results. The more efficient your workflow, the lower your production costs and waste.

Kodak Professional

UV-Curable Clear Display Film

Features	Benefits
Superior ink adhesion	<ul style="list-style-type: none"> ▪ Exceptionally durable finished images that can withstand the rigors of transportation and installation
7-mil thickness is ideal for UV-Curable inkjet printing	<ul style="list-style-type: none"> ▪ Optimized for printer transport ▪ Durable, flexible, and less prone to kinking
KODAK ESTAR Base	<ul style="list-style-type: none"> ▪ Defect free ▪ Dimensionally stable ▪ Will not stretch, deform or delaminate in use ▪ Resists curling and unrolls flat even after storage ▪ Tear proof and crack resistant ▪ Heat tolerant in use
Uniform density & color	<ul style="list-style-type: none"> ▪ Roll-to-roll and batch-to-batch consistency ▪ Finished product has a photographic look that is very similar to the award-winning KODAK PROFESSIONAL ENDURA Clear Display Material
