

Why Simply Display  
When You Can DAZZLE?

**Kodak** Professional  
UV-Curable Display Media

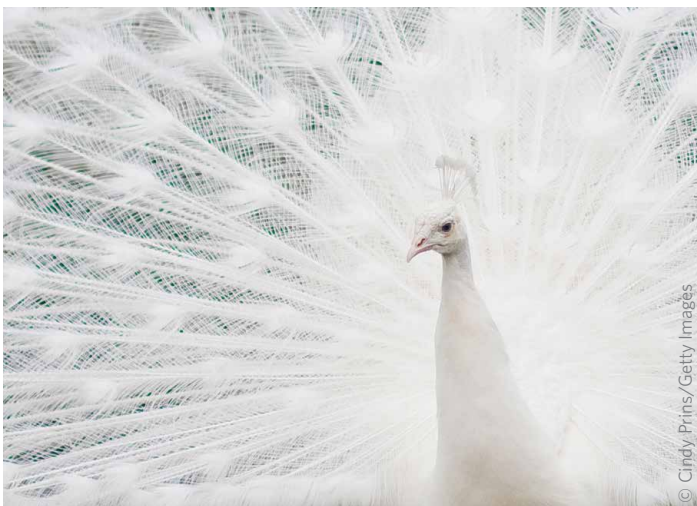

## SURPRISINGLY WHITE

## SHOCKINGLY WHITE

## STARTLINGLY WHITE

Presenting a powerful solution for the commercial display market, bringing the premium look of photo-grade printing to UV-curable inkjet applications.

KODAK PROFESSIONAL UV-Curable Display Film enables the creation of cost-effective, high-impact displays. This high-quality, low-cost alternative to traditional display materials are ideal for point-of-sale and advertising, especially in high-traffic applications.

UV-Curable Display Film features exceptional clarity, consistency, and quality.

- **Photographic Look:** Our UV-Curable Display Media can be mixed with traditional photographic signage and display, enabling a wide range of output solutions and printing strategies that balance quality and value.
- **High-Quality, Photographic-Base Materials:** UV Display media leverages proprietary professional photographic technology, produced to the most stringent industry standards — resulting in consistent output. This allows for maximum throughput and helps avoid costly rework.
- **Batch Consistency:** Even during long runs, output quality remains true. The media is designed to receive inks consistently across the entire production run, resulting in colors that match from start to finish. Within the roll or across multiple rolls, expect predictable results. The more efficient your workflow, the lower your production costs and waste.
